

## Crew Change Procedure at Merak Port, Indonesia

### I. Protocol for Sign Off Crew (foreign and Indonesian):

- a. Initial screening of RT Antigen crew on board by KKP officers, if negative result then crew ashore to continue the first PCR test and quarantine at the designated Hotel.
- b. After screening of RT Antigen crew Off, if negative result the ship can resume its operational activities without having to wait for the result of the First PCR crew ashore the First PCR (negative result) and continued with quarantine for 5 days at the designated hotel. After 5 days of quarantine at the hotel, crew must run the second PCR Test and if the results is negative then crew can continue to airport for his flight.
- c. Report the test results to the E-HAC system of the Ministry of Health.
- d. In the initial screening of RT Antigen test result is "positive", then all crew members must be screened with RT Antigen. If the screening is found other crew (not off) the test result is positive then IT IS MANDATORY to be examined with PCR test which result RT Antigen early and PCR First positive then obliged to do isolation in the location determined by the KKP/Ministry of Health until declared negative.
- e. If ship found positive crew, then it is recommended that disinfectant spraying be carried out.
- f. Designated hotels appointed by KKP Banten to conduct a quarantine are as follows:
  1. Aston Cilegon Hotel
  2. Hotel Royale Krakatau
  3. Hotel Forbis

### II. Protocol for Sign On Crew (foreign):

- a. Crew must bring PCR test results from the country of origin with negative result. Upon arrival at the airport, the crew must carry out health protocols namely 1st PCR Test (negative) – Quarantine 5 Days – 2nd PCR test (negative) – continue the journey to the ship location to be on board.
- b. Crew must report the arrival of the crew to the Banten KKP by showing the results of the PCR test.
- c. It is important to note that for on board to ship must be done within 3 x 24 hours after the 2nd PCR test as referred to above, if it exceeds the time, then the Port KKP can ask to be re-test.
- d. Report the test results to the E-HAC system of the Ministry of Health.
- e. Quarantine process upon arrival at the airport will be guided by the Airport KKP officers, if in the initial screening at the airport that RT Antigen and PCR positive results, then the crew must undergo the next health protocol that is Isolation in the location determined KKP/Task Force Covid 19.
